Emblem Engraving

In an emergency, response personnel need to be aware of your critical medial information in order to treat you correctly. Your MedicAlert® emblem will be engraved with your membership number and our 24-hour hotline to enable responders to assist you immediately.

Pendant

Bracelet

Please Note:

Once your emblem has been engraved and shipped, there will be an additional charge for any changes requested. Emblem engraving is personalized to individual Members and cannot be transferred to another individual. To help assure you receive thorough, accurate treatment, the condition our trained staff deems most relevant to your medical needs in an immediate emergency treatment will be engraved on your emblem.

Dog Tag

Dog Tag - Black

Did you know? ●●●●●●●●

There's only one MedicAlert®. It's the original, nonprofit emergency medical information service founded by a physician in 1956.

From the beginning, MedicAlert® has provided educational outreach to emergency personnel, so they respond to your MedicAlert® Emblem by reading the conditions and phone number engraved on it and calling immediately for more information.

MedicAlert® now serves more than four million Members from around the world.

It's testament to the power of one, simple idea that has helped save tens of thousands of lives.

"I had a seizure while I was walking home. The EMT called MedicAlert® and your staff was on top of it by providing the EMT my medical information and contacting my parents who met me at the emergency department. I really appreciate the service from the bottom of my heart."

Protect Yourself with the Nation's
 Leading Emergency Medical
 Information Service

MedicAlert®
 Can Simply
 Save Your Life

In a medical emergency, things happen fast. Emergency responders need a simple way to get more information. That's why, for almost 50 years, they've checked for the famous, body-worn MedicAlert® Emblem.

When they see MedicAlert®, they know critical information to protect your health, even save your life, is close at hand, just a phone call away.

Someone who cares will always answer the call

Registered nurses, trained in emergency medicine, are available at the MedicAlert® 24-hour Emergency Response Center to answer the call if you are unable to speak for yourself. One call to MedicAlert® provides:

- Your vital medical information, including medications, dosages and details about implants and medical devices
- Family notification – MedicAlert® calls your personal contacts, so you're not alone in a crisis
- Identification – often necessary, if you are unconscious or confused

Keeping your information current is simple, too

MedicAlert® knows you may change prescriptions, dosages, doctors, or more. That's why we put you in control with secure online access to your records, so you can update them from home.

Or, if you prefer, call us toll-free any time and speak with a trained Member Service Associate. You will be mailed a printed record summary to verify the changes you made.

We make it easy to update, because emergency personnel count on the data you provide. With MedicAlert®, your information is available instantly when needed and securely protected at all times.
